THE DATE

For the last several years, the Brain Injury Alliance of Arizona and the Arizona Governor's Council on Spinal and Head Injuries have collaborated with partners to present the ***Mysteries of Brain Injury*** professional conference.

This year we're excited to collaborate with the National Association of State Head Injury Administrators to host its annual conference. We're sure our ***Mysteries of Brain Injury*** audience will find this an exciting variation for 2017.

Sharing the Lessons, Advancing the Learning will bring a national audience to Tempe to join Arizona experts in discussing concussion, brain injury in the military, juvenile justice, Native American perspectives, employment after brain injury, and more.

The Pre-Conference will focus on how brain injury in childhood or adolescence impacts youth and families during the transition to adulthood and the world of work.
